07029090 LEWIS CREEK NEAR DYERSBURG, TN

Hatchie-Obion Basin
North Fork Forked Deer Subbasin

LOCATION.--Lat 36°03′14″, long 89°21′42″ referenced to North American Datum of 1927, Dyer County, TN, Hydrologic Unit 08010204, at bridge on U.S. Highway 51 (Business Route), 2.1 mi northeast of square in Dyersburg.

DRAINAGE AREA.--25.5 mi^2.

SURFACE-WATER RECORDS

PERIOD OF RECORD.--1955-78, 1980-83, 1985-2011

GAGE.--Datum of gage is 276.52 ft above NGVD of 1929.

REMARKS.--As the number of streams on which streamflow information is likely to be desired far exceeds the number of stream-gaging stations feasible to operate at one time, the Geological Survey collects limited streamflow data at sites other than stream-gaging stations. When limited streamflow data are collected on a systematic basis over a period of years for use in hydrologic analyses, the site at which the data are collected is called a partial-record station. Data collected at these partial-record stations are usable in low-flow or floodflow analyses, depending on the type of data collected.

The following table contains annual maximum discharges for crest-stage stations. A crest-stage gage is a device that will register the peak stage occurring between inspections of the gage. A stage-discharge relation for each gage is developed from current meter or indirect measurements of peak flow. The date of the maximum discharge is not always certain but is usually determined by comparison with nearby continuous-record stations, weather records, or local inquiry. Only the maximum discharge for each water year is given. Information on some lower floods may have been obtained, but is not published herein. The years given in the period of record represent water years for which the annual maximum has been determined.

EXTREMES FOR PERIOD OF RECORD.--Maximum discharge, unknown, Mar. 2, 1997; maximum gage height, 19.10 ft.

REVISIONS.--Peaks for periods 1971-1989 are for gage height only, discharges for this period given in previous reports are estimates. Peak discharges for Mar. 2, 1997 event has been changed to unknown because rating needs more definition at that gage height.

MAXIMUM PEAK DISCHARGE
WATER YEAR OCTOBER 2010 TO SEPTEMBER 2011

Date	Discharge, in ft^3/s	Discharge qualification code	Gage height, in ft	Gage height qualification code
Feb 24, 2011	5,660	---	16.66	---
