

Water-Data Report 2008

02143500 INDIAN CREEK NEAR LABORATORY, NC

Santee Basin
South Fork Catawba Subbasin

LOCATION.--Lat 35°25'14", long 81°15'55" referenced to North American Datum of 1983, Lincoln County, NC, Hydrologic Unit 03050102, on left bank 250 ft upstream from remains of Rudisill Mill dam, 0.5 mi upstream from bridge on Secondary Road 1252, 1.5 mi south of Laboratory, 1.5 mi upstream from mouth, and 3.5 mi south of Lincoln.

DRAINAGE AREA.--69.2 mi².

SURFACE-WATER RECORDS

PERIOD OF RECORD.--August 1951 to current year.

REVISED RECORDS.--WDR NC-71-1: 1970 (maximum discharge). WDR NC-80-1: Drainage area.

GAGE.--Water-stage recorder and crest-stage gage. Datum of gage is 741.62 ft above North American Vertical Datum of 1988, from levels. Satellite telemetry at station.

REMARKS.--Records good, except those for estimated daily mean discharges, which are poor. The City of Cherryville diverts water from Indian Creek for water supply upstream from gaging station and returns treated effluent to Indian Creek upstream of gaging station; a daily average of 1.25 ft³/s was diverted during the year, and a daily average of 0.62 ft³/s of treated effluent was returned to the creek during the year. Minimum discharges, since 1963, affected by regulation. Minimum discharge for period of record also occurred September 14, 2002. Minimum discharge for current water year also occurred October 14-17.

EXTREMES OUTSIDE PERIOD OF RECORD.--Peak discharge of flood in October 1929 was 9,920 ft³/s; flood in July 1916, 7,840 ft³/s; flood in August 1940, 6,000 ft³/s. Discharge based on computation of peak flow over dam 1 mi downstream, using floodmarks and information by local resident.
