PERIOD OF RECORD.--October 2011 to October 2012.

PERIOD OF DAILY RECORD.--November 18, 2011 to October 4, 2012.

INSTRUMENTATION.--YSI 6920V2, multi-parameter instrument equipped to monitor water temperature, specific conductance, dissolved oxygen (DO) (optical), and turbidity (6136), was installed on November 18, 2011 and was replaced on January 20, 2012 with YSI 6600V2-4 equipped to record the same parameters. The YSI 6600V2-4 was removed and discontinued on October 04, 2012. Parameter readings were recorded at 15-minute intervals and transmitted real-time to NWIS web. Any use of trade, product, or firm names in this publication is for descriptive purposes only and does not imply endorsement by U.S. Government.

REMARKS.--Monthly water-quality samples and continuous water-quality data were collected on site between October 2011 and October 2012. Site conditions were not suitable for continuous monitoring of specific conductance and turbidity. Certain periods of continuous data from these constituents are considered extremely poor and are described as follows.

SPECIFIC CONDUCTANCE: Corrections greater than 30% or 20 µS/cm occurred from March 12 to March 26, from March 28 to April 9, from May 17 to May 22, and from May 25 to May 31. These date ranges are of extremely poor data quality but were left in the record.

TURBIDITY: From December 7 to December 13, 2011 and March 14 to March 15, 2012, data corrections exceeded 30% or 3 FNU. These date ranges are of extremely poor data quality but were left in the record.

COOPERATION.--Water-quality and biological data collection in 2011 and 2012 was completed in cooperation with the Lower Boise Watershed Council and Idaho Department of Environmental Quality.

EXTREMES FOR PERIOD OF DAILY RECORD.--

WATER TEMPERATURE: Maximum, 18.6 °C on July 12, 2012; minimum, 0.2 °C on December 22, 23, 24, 2011, and February 28, 2012.

SPECIFIC CONDUCTANCE: Maximum, 990 µS/cm on July 8, 2012; minimum, 93 µS/cm on March 21, 2012.

TURBIDITY: Maximum, 470 FNU April 26, 2012; minimum, 0.0 FNU on December 13, 2011, and February 21, 2012.

DISSOLVED OXYGEN: Maximum recorded, 12.9 mg/L January 27, 28, February 24, March 2, 7, and 8, 2012; minimum recorded, 1.6 mg/L October 1, 2012.
