

1694950 Fagaalu Stream at Fagaalu, Tutuila, American Samoa

LOCATION.--Lat -14°17'19", long 170°41'31" referenced to North American Datum of 1983, Tutuila County, located at quarry, 0.5 miles west of Lyndon B. Johnson Hospital, 0.9 miles southwest of Utulei High School. Elevation is 120 feet from topographic map.

SURFACE-WATER RECORDS

PERIOD OF RECORD.--September 2004 to October 2008.(Discontinued)

REMARKS.--As the number of streams on which streamflow information is likely to be desired far exceeds the number of continuous-record stream-gaging stations feasible to operate at one time, the Geological Survey collects limited streamflow data at sites other than continuous-record stream-gaging stations. When limited streamflow data are collected on a systematic basis over a period of years for use in hydrologic analyses, the site at which the data are collected is called a partial-record station. Data collected at these partial-record stations are usable in low-flow or flood-flow analyses, depending on the type of data collected.

In addition, discharge measurements are made at other sites not included in the partial-record program. These measurements are generally made in times of drought or flood to give better areal coverage to these events. Those measurements and others collected for some special reason are called measurements at miscellaneous sites.

DISCHARGE MEASUREMENTS WATER YEAR OCTOBER 2007 TO SEPTEMBER 2008

Date	Discharge, in ft ³ /s
Nov 28, 2007	0.70
Jan 23, 2008	1.49
Mar 20, 2008	0.54
May 15, 2008	0.57
Jul 8, 2008	0.78
